Profile

A .NET developer with 2.5+ years of experience (2+ years of commercial experience). I have worked on various projects, ranging from a large monolithic application to microservices. I implemented new, diverse, unused functionality in my workplaces, which brought great profits to companies.

Education

2022 — 2026

Tambov State Technical University

Bachelor's degree, Department of Automated Decision-making

2018 — 2022

Multidisciplinary College Tambov State Technical University

Secondary professional, programmer technician

Key Skills

Professional	Personal
.NET	Communication
ASP.NET	Time management
MongoDB	Teamwork
PostgreSQL	Creativity
ClickHouse	Attention to details
Microservices	Desire to learn
Docker	Meeting deadlines
Git	Responsibility
Jira	Initiative

Employment

2023 — Cur.

Backend Developer at hybrid.ai

Developed a large application service for working with AWS S3 storage and implemented it into the project.

Developed two from scratch .NET 8 microservices that worked with PostgreSQL (using EF Code), Google API. They were located on the Proxmox server and were launched in a docker container. I installed the system for Proxmox on my own and deployed applications on it.

Wrote small infrastructure scripts in Python to optimize my own activities.

2021 — 2022

Backend Developer at Techservice LLC

Created a website a website www.poverka-gazvoda.ru

Wrote a program to search for indexes in the provided address registry by parsing information from the site.

Generated reports using complex SQL queries (a bunch of several massive tables) based on the necessary data that was stored in the Oracle database.
